DURABLE GROWTH IN NEUROSCIENCE INDUSTRY

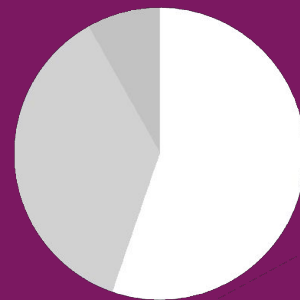

XYWAV GROWTH

Increases in Xywav usage driven by higher volumes in narcolepsy and idiopathic hypersomnia (IH) provide durable revenue

ROYALTIES

Royalties from authorized generic provide an additional buffer

REVENUE SPLIT

- 2024: Xywav \$1.47B

- Royalties \$218M

OPTIONALITY IN ONCOLOGY: ZIIHERA

RECENT APPROVALS

SODIUM OXYBATE NARCOLEPSY THERAPEUTICS MARKET SEGMENTATION (\$1.643b)

* Jazz Epidiolex is the only cannabis-based cannabinoid in the market

Porter's Five Forces

03.

PORTER'S FIVE FORCES

Threat of New Entrants: Low

Xywav, Epidiolex dominate difficult market with strict FDA approval process

Supplier Power: Low-Medium

Large network of suppliers, some specialized ingredients give suppliers some leverage

Buyer Power: Medium-High

Wield rebates and prior authorizations, long history of successful acquisitions

Threat of Substitutes: Medium

Rapid innovation in oncology, Lumryz slowly gaining market presence

Rivalry: Low

Niche markets, almost 80% share in sodium oxybate narcolepsy therapeutics, Ziihera will be new market standard

Risks and Mitigants

04.

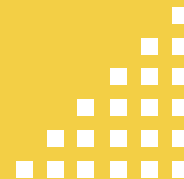

MARKET COMPETITION

RISK

- Growing Pressure in Narcolepsy Drugs
- Avadel's LUMRYZ is a direct competitor to Xywav

MITIGANT

- Strengthen physician outreach to emphasize clinical benefits of Xywav (lower sodium)
- Reduce reliance on Xywav by investing in oncology & other neurology drugs

REGULATORY AND APPROVAL RISK

RISK

- Delays, rejection, or stricter FDA requirements could slow new product launches

MITIGANT

- Zihara recently passed phase 3 (almost ready for market)
- Maintain clinical trial design and data quality

PRICE PRESSURE

RISK

- Price pressure or government policy changes can result in Jazz having to decrease prices

MITIGANT

- Jazz's robust pipeline and diverse portfolio provide stability
- Potential for acquisitions outweigh potential price drops
